# How to enable running script in windows?

Running scripts is disabled by default on the laptop.
So you need to make some changes by running the PowerShell in administrative mode.

Steps:

1. Run Windows PowerShell as administrator.
   - Type the PowerShell in the search field.

   - Right-click on Windows PowerShell and then select the run as administrator. It will open a dialogue box, and click on the yes button.
   - It will open a Windows PowerShell which will run as an administrator.

2. Run following commands

get-ExecutionPolicy

```
PS C:\windows\system32> get-ExecutionPolicy
Restricted
```

if restricted; run the following command

set-ExecutionPolicy Unrestricted

```
PS C:\windows\system32> get-ExecutionPolicy
Restricted
PS C:\windows\system32> set-ExecutionPolicy Unrestricted

Execution Policy Change
The execution policy helps protect you from scripts that you do not trust. Changing the execution policy might expose
you to the security risks described in the about_Execution_Policies help topic at
https://go.microsoft.com/fwlink/?LinkID=135170. Do you want to change the execution policy?
[Y] Yes  [A] Yes to All  [N] No  [L] No to All  [S] Suspend  [?] Help (default is "N"):
```

and set to all

```
PS C:\windows\system32> get-ExecutionPolicy
Restricted
PS C:\windows\system32> set-ExecutionPolicy Unrestricted

Execution Policy Change
The execution policy helps protect you from scripts that you do not trust. Changing the execution policy might expose
you to the security risks described in the about_Execution_Policies help topic at
https://go.microsoft.com/fwlink/?LinkID=135170. Do you want to change the execution policy?
[Y] Yes  [A] Yes to All  [N] No  [L] No to All  [S] Suspend  [?] Help (default is "N"): A
PS C:\windows\system32> get-ExecutionPolicy
Unrestricted
```

again check by the following command.

```
PS C:\Users\HP> get-ExecutionPolicy
Unrestricted
```

it will get unrestricted.
